

I have a grave concern about the proposed Broadcast Flag, it is a stinky poo. don't compromise our rights for more money, by doing this you are desecrating the foundation of this country and the principles our society was founded upon. by doing this you're no better than the people who want to blow the country up with airplanes and bombs.

I am a law-abiding consumer who believes that piracy should be prevented and prosecuted. However, if theoretical prevention comes at the cost of prohibiting me from making legal, personal use of my content, then the FCC should be working to protect all consumers rather than enable those who would restrict consumer rights. In the case of the broadcast flag, it seems that it will have little effect on piracy. With file-sharing networks, a TV program has only to be cracked once, and it will propagate rapidly across the Internet. So, while I may be required to purchased consumer electronic devices that cost more and allow me to do less, piracy will not be diminished.

In closing, I urge you not to mandate the broadcast flag, thanks.

have a nice day :^)
